## DETAILED ACTION

### *Priority*

1. The current status of all nonprovisional parent applications referenced should be included in the specification; that is, the specification must be amended to reflect the fact that the parent application has been issued as US Patent number 6,660,241.

### *Claim Rejections - 35 USC § 112*

2. Claims 28-50 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The specification fails to adequately define the term "polymer process aid".

3. Claims 28-50 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention. Applicants appear to have mis-claimed the invention. Applicant has stated that support for claims 28-50 can be found in pages 9 to 11 of the specification. This is not quite so. The mentioned passage describes: (1) a composition comprising the purported inventive h-BN platelets and a (melt-processable) polymer or (2) a composition comprising the (purported) inventive h-BN and a polymer process aid (emphasis added). At page 10, line 31 to page 11, line 2, in particular, it describes a combination of h-BN with a polymer process aid. This is very different from the subject matter of instant claims that is directed to a "polymer process aid" comprising the h-BN platelets and a polymer. The "polymer process aid" is not the invention but rather a component in the composition that contains the h-BN of the instant invention.
